

UltraClean COMBER

Superior Short Staple Cotton for Nonwoven Fabrics

Short staple cotton that fits the Eco label as a textile derived byproduct that is recycled back into nonwoven fabrics. This superior comber product has been processed to remove the micro-fibers that create dusting in processing. The improved openness of the UltraClean Comber optimizes processing on nonwoven lines.

Attributes

- High Quality Cotton comber recycled from textile mills producing 100% cotton yarns
- Exceptional whiteness & cleanliness
