

Revolutionary Soft Purified Hydrophobic Cotton

HyDri® Cotton allows nonwoven fabric producers to design fabrics that manage and control moisture; while providing comfort as it has for centuries in apparel coming in contact with the skin. HyDri® Cotton is the new All-Natural replacement for extruded films or poly-based material in sensitive areas. The unmatched performance of cotton is now here for those important times. HyDri® Cotton is the 1st Purified Cotton that provides natural softness next to their skin and serves as the perfect replacement for extruded films or poly-based material in sensitive areas.

Attributes
